BNY Mellon Sustainable Balanced Fund

Class K DRAKX ★★★★★

Morningstar Rating™ based on risk-adjusted returns as of 9/30/2021. Overall rating for the World Allocation category. Fund ratings are out of 5 stars: Overall 5 stars Class K (417 funds rated); 3 Yrs. 5 stars Class K (417 funds rated). Past performance is no guarantee of future results.*

### Growth of a $10,000 Investment

A hypothetical $10,000 investment in the fund’s Class K shares on 11/30/17 would have been worth $13,327 on 9/30/21.

Assumes reinvestment of dividends and capital gains. Performance for the fund’s other share classes would vary.

DUE TO RECENT MARKET VOLATILITY, CURRENT PERFORMANCE MAY BE DIFFERENT THAN THE FIGURES SHOWN.

The performance data quoted represents past performance, which is no guarantee of future results. Share price and investment return fluctuate, and an investor’s shares may be worth more or less than original cost upon redemption. Current performance may be lower or higher than the performance quoted. Performance for periods less than 1 year is not annualized. Go to im.bnymellon.com for the fund’s most recent month-end returns. The net expense ratio(s) reflect a contractual expense reduction agreement through 3/1/2022, without which, the returns would have been lower. Total Expense Ratio: Class K 1.42%. Net Expense Ratio: Class K 0.15%. Not all classes of shares may be available to all investors or through all broker-dealer platforms.

Part of the fund’s recent performance is attributable to positive returns from its initial public offering (IPO) investments. There can be no guarantee that IPOs will have or continue to have a positive effect on fund performance. Currently, the fund is relatively small in asset size. IPOs tend to have a reduced effect on performance as a fund’s asset base grows.

Effective April 1, 2019, Dreyfus Global Multi-Asset Income Fund was renamed BNY Mellon Sustainable Balanced Fund. The fund’s Class Y shares and Class A shares were renamed Class K shares and Service Class shares, respectively, effective April 1, 2019. As of March 31, 2019, Class K shares are not available for purchase by individual investors. Class K shares are generally only offered to state-sponsored and/or state-administered retirement savings plans. Investors should discuss with their financial professional the eligibility requirements for Class K and Service Class shares and the historical results achieved by the fund’s respective share classes.

*Portfolio composition is as of 9/30/2021 and is subject to change at any time.²Performance figures may reflect reimbursements or fee waivers, without which the performance would have been lower. Source: FactSet. The Customized Blended Index is composed of 60% MSCI All Country World Index (NDR) and 40% Bloomberg MSCI US Aggregate ESG-Weighted Select Sector Neutral Index. The MSCI All Country World Index captures large and mid-cap representation across Developed Market (DM) countries and Emerging Market (EM) countries. The Bloomberg MSCI U.S. Aggregate ESG-Weighted Select Sector Neutral Index identifies fixed-income securities that satisfy certain ESG and liquidity criteria from the Bloomberg US Aggregate Bond Index (which is designed to broadly capture the U.S. investment grade, taxable fixed income market). With respect to corporate debt securities, the Bloomberg MSCI U.S. Aggregate ESG-Weighted Select Sector Neutral Index uses MSCI ESG rankings to measure ESG performance on an industry-specific basis, with ESG assessment categories and materiality varying by industry. Index rules generally exclude companies with significant activities in certain businesses, such as those involving alcohol, tobacco, nuclear power, gambling, and civilian firearms and other weapons. Investors cannot invest directly in any index. Newton and/or the “Newton Investment Management” brand refers to Newton Investment Management Limited. Newton is incorporated in the United Kingdom and is authorized and regulated by the Financial Conduct Authority in the conduct of investment business. Newton is registered with the U.S. Securities and Exchange Commission (SEC) as an investment adviser. Newton is a subsidiary of The Bank of New York Mellon Corporation.

Investors should consider the investment objectives, risks, charges and expenses of a mutual fund carefully before investing. To obtain a prospectus, or a summary prospectus, if available, that contains this and other information about a fund, contact your financial professional or visit im.bnymellon.com. Read the prospectus carefully before investing.

*Source: Morningstar. The Morningstar Rating™ for funds, or “star rating,” is calculated for managed products with at least a 3-year history. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product’s monthly excess performance (not including the effects of sales charges, loads and redemption fees if applicable), placing more emphasis on downward variations and rewarding consistent performance. Managed products, including open-end mutual funds, closed-end funds and exchange-traded funds, are considered a single population for comparative purposes. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its 3-, 5-, and 10-year (if applicable) Morningstar Rating metrics. ©2021 Morningstar, Inc. All rights reserved. The information contained herein: (1) is proprietary to Morningstar and/or its content providers; (2) may not be copied or distributed; and (3) is not warranted to be accurate, complete, or timely. Neither Morningstar nor its content providers are responsible for any damages or losses arising from any use of this information. Past performance is no guarantee of future results. The fund represents a single portfolio with multiple share classes that have different expense structures. Other share classes may have achieved different results. Ratings do not reduce investment risk and are subject to change.

1Portfolio composition is as of 9/30/2021 and is subject to change at any time.

Risks: Bonds are subject generally to interest-rate, credit, liquidity, call and market risks, to varying degrees. Generally, all other factors being equal, bond prices are inversely related to interest-rate changes and rate increases can cause price declines. Equities are subject to market, market sector, market liquidity, issuer, and investment style risks, among other factors, to varying degrees. Currencies are subject to the risk that those currencies will decline in value relative to a local currency, or, in the case of hedged positions, that the local currency will decline relative to the currency being hedged. Each of these risks could increase the fund’s volatility. Investing in foreign denominated and/or domiciled securities involves special risks, including changes in currency exchange rates, political, economic, and social instability, limited company information, differing auditing and legal standards, and less market liquidity. These risks generally are greater with emerging market countries. Impact investing and/or Environmental, Social and Governance (ESG) managers may take into consideration factors beyond traditional financial information to select securities, which could result in relative investment performance deviating from other strategies or broad market benchmarks, depending on whether such sectors or investments are in or out of favor in the market. Further, ESG strategies may rely on certain values based criteria to eliminate exposures found in similar strategies or broad market benchmarks, which could also result in relative investment performance deviating. Recent market risks include pandemic risks related to COVID-19. The effects of COVID-19 have contributed to increased volatility in global markets and will likely affect certain countries, companies, industries and market sectors more dramatically than others. To the extent the fund may overweight its investments in certain countries, companies, industries or market sectors, such positions will increase the fund’s exposure to risk of loss from adverse developments affecting those countries, companies, industries or sectors.
