What is FAFSA?

The FAFSA (Free Application for Federal Student Aid) determines federal eligibility for needs-based financial aid including outright federal grants and scholarships (that do not need to be paid back), as well as low-interest parent or student loans (which must be paid back). For students looking to attend college, it is one of the first and most important documents to complete.

Administered and filed through the US Department of Education, FAFSA is also used by colleges and states to assist in determining eligibility for their grants or scholarships. Students need to reapply each year for FAFSA determination of aid eligibility for the following academic year.

To make filing a FAFSA easier for families, the timing for submitting FAFSA applications has been changed to make the college application and decision process easier when taking financial aid into account.

How does FAFSA work?

FAFSA has a series of calculations that are used to determine your federal financial aid. It can seem a little complex, so let’s break down how it works. Your amount of federal financial aid uses this formula:

\[
\text{Financial Aid Eligibility Amount} = \text{COA} - \text{EFC}
\]

The Cost of Attendance (COA) is relatively straightforward and you can obtain from the school you’re interested in attending.
How is the Expected Family Contribution (EFC) calculated?

<tr>
<td>Parent’s adjustment gross income, taxable income, untaxed income and benefits, adjusted due to size of household and number of students in college.</td>
<td>Student’s adjusted gross income above $6,420.</td>
</tr>
<tr>
<td>Up to 5.64% Assets</td>
<td>20% Assets</td>
</tr>
<tr>
<td>Parent’s including 529 plans, investments and savings, cash, checking accounts net worth of business and/or investment farm, less allowance based on the oldest parent’s age. Excluded: retirement assets and primary residences.</td>
<td>Student’s assets in bank accounts, CDs, UGMA/UTMAs and any other savings account in the student’s name except 529 accounts which are counted as parental assets.</td>
</tr>
</tbody>
</table>

Additional info to know about FAFSA

- The higher your EFC, the less federal aid will be available.
- Items not included in the EFC include: value of the family’s home, retirement assets, grandparent income or assets including a grandparent-owned 529 account.
- Your family’s current annual income, including your student’s, counts far more in the formula than savings and investments, especially when they are in the parents’ names. In addition, the formula protects the parent’s education savings and assets by providing an allowance based on the age of the parent.
- Only 0.6% of students enrolled in a public four-year college and 1.0% enrolled in private nonprofit four-year college have $0 net cost of attendance after grants. ¹

There are many other nuances in calculating the EFC. Consult a financial or tax advisor.

An investor should consider the Plan’s investment objectives, risks, charges and expenses before investing. The Program Disclosure Statement, at www.NEST529Advisor.com, which contains more information, should be read carefully before investing.

Investors should consider before investing whether their or their beneficiary’s home state offers any state tax or other state benefits such as financial aid, scholarship funds, and protection from creditors that are only available for investments in such state’s qualified tuition program and should consult their tax advisor, attorney and/or other advisor regarding their specific legal, investment or tax situation.

This material is provided for general and educational purposes only, and is not intended to provide legal, tax or investment advice, or for use to avoid penalties that may be imposed under U.S. federal tax laws. This material is not an offer to sell or a solicitation of an offer to buy any securities. Any offer to sell units within the Plan may only be made by the Program Disclosure Statement and Participation Agreement relating to the Plan.

Participation in the Plan does not guarantee that contributions and the investment return on contributions, if any, will be adequate to cover tuition and other higher education expenses, or that a beneficiary will be admitted to or permitted to continue to attend an eligible educational institution.
